

Fewer false alarms.  
Faster release.

PIONEERING DIAGNOSTICS

# Make informed decisions. Go to market faster.

Raw beef and other meat products have a short shelf life, which means time is of the essence throughout the entire supply chain.. Reliable testing methods are essential to prevent contamination from *E.coli* O157:H7, *Salmonella*, and other pathogenic EHEC strains, but delays can lead to wasted products and lost profits. Beef producers need testing solutions that are both accurate and efficient. bioMérieux testing solutions provide rapid results, streamlined workflows, and unrivaled specificity to protect your customers, your reputation, and your bottom line.

## **GAIN ACCESS TO GLOBAL MARKETS.**

The global beef market offers great opportunities for growth. To gain access to new markets and maintain existing relationships, producers and distributors must ensure product safety and quality. For over 25 years, bioMérieux has been committed to developing industry-leading, globally recognized food safety solutions that make it easier to sell your products where and when you need to expand your business.

### **ACCURATE**

- Ensure product safety
- Identify issues efficiently
- Provide evidence of control

### **RAPID**

- Pinpoint production problems
- Take corrective actions sooner
- Reduce time to market

### **STREAMLINED**

- Increase productivity
- Ensure data traceability
- Eliminate error potential

## TAKE CONTROL OF YOUR HACCP PROGRAM.

Monitoring the performance of your Hazard Analysis Critical Control Points (HACCP) system—while keeping productivity levels high—requires accurate, automated, and traceable microbial testing methods. Getting those test results quickly enables faster corrective actions. bioMérieux testing solutions allow you to deliver consistent, high-quality beef products while saving valuable distribution time.

### UNLOCK VALUE WITH A STREAMLINED WORKFLOW.

Pathogen reduction control testing takes time, labor, and training. Minimizing all three of these without compromising accuracy can lead to significant savings. That's why all our testing solutions have intuitive interfaces which increase productivity. With bioMérieux's internationally validated solutions, you'll reap the benefits almost immediately for either local or international distribution.

#### SPEED & ACCURACY

From Pasture to Finished Product

#### QUICKER TO MARKET

Improved Customer Satisfaction

#### MAXIMIZE PROFITABILITY

Faster Distribution

## STATE-OF-THE-ART TESTING AND DATA MANAGEMENT.

bioMérieux testing solutions are intuitively designed and simplified to protect sample and data integrity. Our LIMS-compatible systems feature built-in data management to ensure traceability and keep your records within compliance standards by ensuring you can easily access results at a moment's notice.

## TAILORED SOLUTIONS AND EXPERT SUPPORT.

Every lab and plant is different. Our team of microbiology experts specialize in customizing solutions to meet your facility's unique needs, and providing the support you need to make sure your quality-control solutions are keeping your business at its best.

## GET THE RIGHT SOLUTION FOR YOUR LAB.
