BIOMÉRIEUX

PIONEERING DIAGNOSTICS

bioMérieux understands your environmental monitoring (EM) workflow

As a microbiological partner for more than 55 years, we realize that the EM process can be cumbersome by involving multiple departments, plenty of low value-added tasks, and several risks of errors.

That is why we developed our complete range of 3P® environmental monitoring solutions.

3P® CONNECT is a comprehensive system that includes a dedicated software and a pre bar-coded plate solution, all designed to secure traceability and collection of the data to ensure reliable decision-making and optimize process efficiency.

OVERCOME EM PROCESS CHALLENGES

Eliminate paper-based process

Lessen time collecting and reconciling samples

Reduce human error of handwritten recordings and manual transmissions

Increase real-time acquisition of data

Augment traceability for data and actions

Decrease investigations due to manual errors

Connectivity eases EM process

3P® CONNECT is a comprehensive system that includes a dedicated software and a pre bar-coded plate solution, all designed to secure traceability and collection of the data to ensure reliable decision-making and optimize process efficiency.

Skipping the paper-based process decreases risk of errors and saves time during the entire EM process.

3P® CONNECT is designed by and for pharmaceutical EM specialists to easily integrate in your IT environment.

MAINTAIN COMPLIANCE THROUGHOUT EM WORKFLOW

Sample control at each step.

Make reliable decisions based on real-time and compliant data.

Control production areas due to full traceability.

Support compliance under U.S. Food and Drug Administration (FDA) 21 CFR PART 11 standards.

SIMPLIFY EM OPERATIONAL EFFICIENCY

Optimize full EM workflow by reducing the number non-value-added steps.

Reduce the number of errors leading to deviations and investigations.

Allow faster and effective resolution of problem.

OVERALL PEACE OF MIND FOR LAB OPERATIONS

- ▶ Comprehensive guidance for users
- ▶ Flexible turnkey solution for quick and easy implementation and validation
- ▶ Project management to understand your EM workflow and adapt the solution to your own processes

- ▶ Paperless solution
- ▶ Web-based application that adapts to any device
- ▶ Native mobility for use in the production area
- ▶ Unlimited number of users
- ▶ Integration with third-party tools (inc. LIMS and IT Infrastructure)

Features and benefits of 3P® CONNECT

SET-UP AND CONFIGURATION

▶ Sampling plans

▶ Maps of the site and areas

▶ Schedule and assign tours

▶ Users and groups management

ENVIRONMENTAL MONITORING WORKFLOW

Ease of use

• Scan plate barcode and sampling location

• Easy negative plates management

Error Avoidance

• Ensure expiration date, plate type, and settlement duration

• Secure incubation duration

• Rely on alerts and alarms along the process

Full sample traceability

• Full supervision of samples

• Double reading recording possible

DATA ANALYSIS

▶ Traceability analysis

▶ Audit trail

▶ Alarm reports

▶ Production and laboratory view for supervision of samples
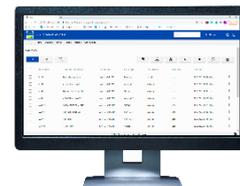

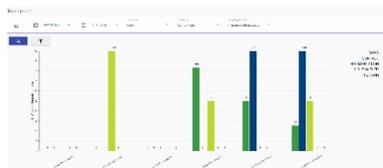

bioMérieux's 3P® CONNECT eases production by using the most efficient tools for your organization

MAXIMIZE YOUR DIGITAL EXPERIENCE WITH 3P® SMART PLATES
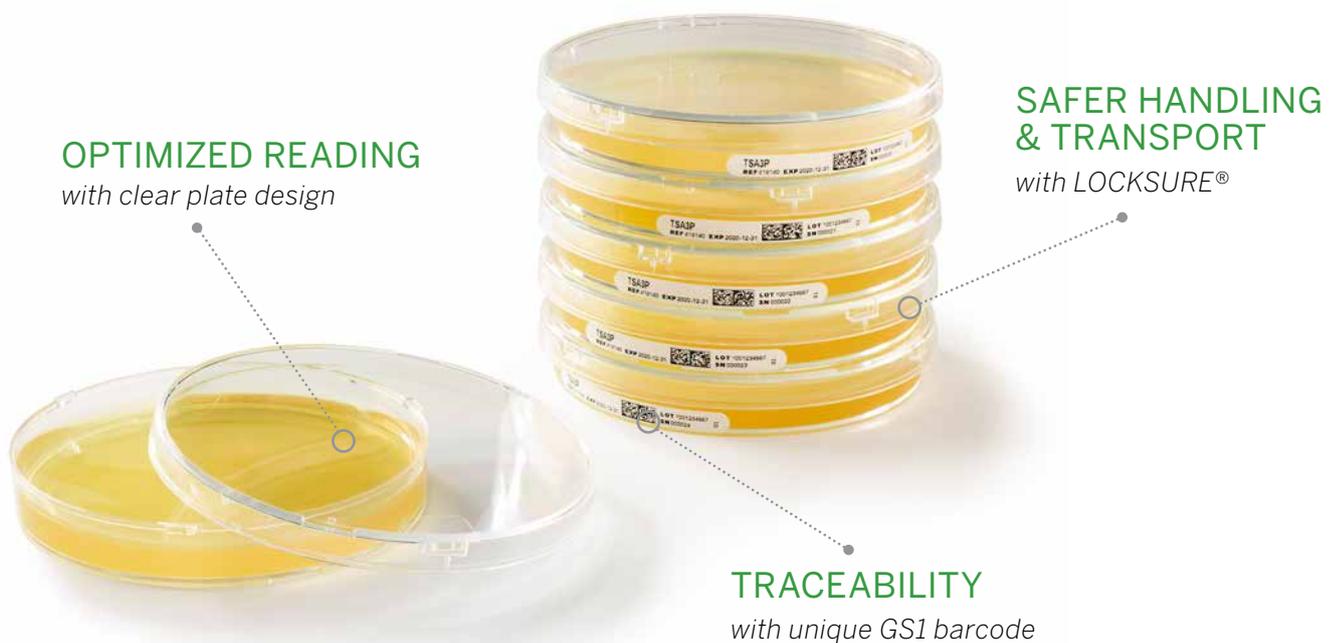

OPTIMIZED READING
with clear plate design

SAFER HANDLING
& TRANSPORT
with LOCKSURE®

TRACEABILITY
with unique GS1 barcode

INTEGRATION MADE FAST AND EASY

Turnkey installation and validation solutions

Expedite the implementation of your investment by reducing installation and validation time:

- Implementation management package (installation, configuration, commissioning, training, project management)

- Comprehensive validation documentation (URS, RA, and VMP)

- IQ OQ, and PQ documentation and execution to ease the validation proces

Continuous operations support

Maximize the uptime of your software and ensure continuous operations:

- High and flexible level of service supports

- Remote service with VILINK®, the safe, secure, and nimble solution for support and update

A NEW SYSTEM IS EM-ERGING

3P® SMART PLATES

3P® CONNECT

3P® ENTERPRISE
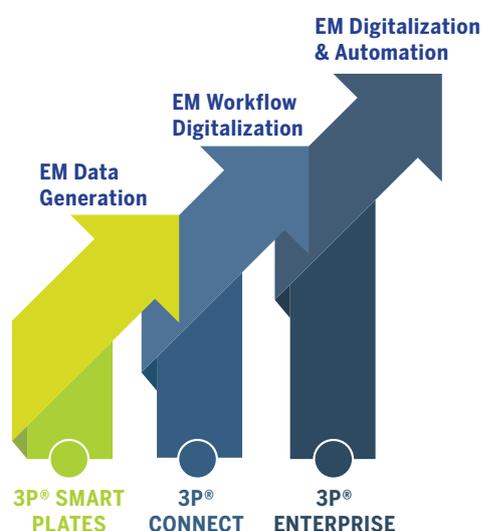

3P® SMART PLATES – Ultra-clear and updated with GS1 barcodes for traceability and LOCKSURE® lids to secure the sample integrity.

3P® CONNECT – Automatically collects, tracks, and saves data, removing the paperwork process to decrease risk of errors and optimize EM process.

3P® ENTERPRISE – End-to-end digitalization and automation EM solution.
