

DO LESS TO SAVE MORE

Revolutionize Microbial Quality Testing for Nutraceuticals

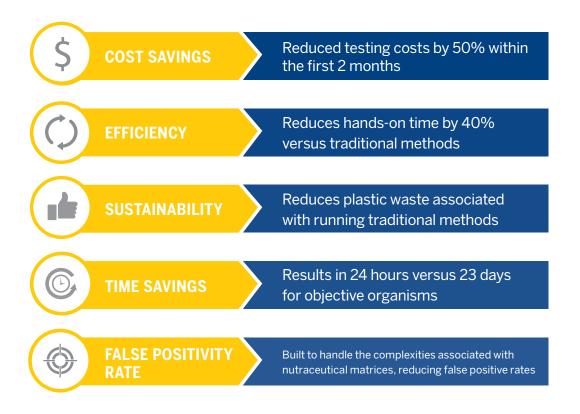

Your Trusted Partner in Augmented Diagnostics

PIONEERING DIAGNOSTICS

Consumer Safety = Brand Reputation

REINVENTING HOW FACILITIES OPERATE

Common traditional nutraceutical microbiology quality and safety testing methods in the industry are cost prohibitive, time consuming, and labor intensive. With more than 60 years of pioneering diagnostics, bioMérieux has reinvented how facilities operate with their comprehensive offering of microbiology solutions.

*Benefit data collected by Herbalife using GENE-UP NUTRAPLEX PRO only.

Simplified rapid methods for nutraceutical testing

Simultaneous Enrichment

Multiplex Detection

Automated Sample Preparation

Automated Enumeration

Innovation in Practice

bioMérieux's innovative solutions were developed to combat the challenges of traditional microbial testing methods, providing a simplified, efficient way to perform standards compliant testing.

Pathogen Detection Testing with GENE-UP®

Fully validated qualitative analysis for objective organism detection, demonstrating equivalency in performance to both USP and FDA BAM methodologies, GENE-UP® delivers results in less than 24 hours, with minimal hands-on time.

- GENE UP
- Objective organism detection made simple, fast, and flexible
- Operational efficiency and user simplicity, resulting in significant time and resource savings
- Intuitive interface with easy-to-use workflow
- More accurate, more affordable testing improves margins and reduces repeat testing
- Reduces sample preparation and false positives and false negatives

Reduces Costs

Streamlines Workflow

Demonstrated USP and FDA BAM Equivalence

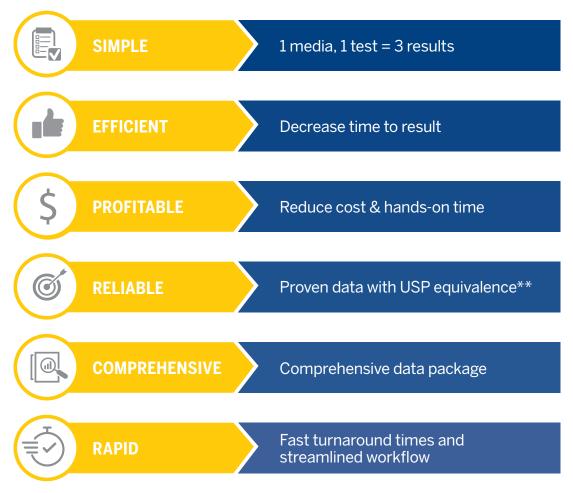

Profitability Increase

Save time and reduce cost with simultaneous detection of *E. coli, Salmonella*, and *S. aureus* in 24 hours

GENE-UP® NUTRAPLEX[™] PRO, developed in partnership with HERBALIFE NUTRITION, is a multiplex assay that simultaneously detects *Escherichia coli, Salmonella* spp. and *Staphylococcus aureus* from a single universal enrichment in 24 hours. GENE-UP® NUTRAPLEX[™] PRO meets the microbial quality testing challenges of the Nutraceutical industry, while improving overall efficiencies and complying with regulations.

Benefits of a GENE-UP[®] NUTRAPLEX[™] Pro Workflow

**AOAC Performance Tested Methodsm

Quality Indicator Testing with TEMPO®

Trusted around the globe, quantitative analysis with TEMPO[®] automates quality indicator testing with objective, easily interpreted results with consistency between different matrices, staff, and batches of product.

- Robust validation data for nutraceutical products
- Eliminates cumbersome, time-consuming sample preparation allowing laboratory staff to work on other value-added services
- Single sample preparation for both pathogen and quality indicator testing
- Automated results and simple workflow improve accuracy, repeatability, and data integrity
- Provides traceability and an audit trail
- Enumerates quality indicators, including total viable counts, coliforms, *E.coli*, *Enterobacteriaceae*, *Staphylococcus aureus*, yeast and mold
- AOAC PTM validated method

Media & Sample Preparation

Optimize your workflow—and get more out of your laboratory with advanced media and sample prep solutions.

- Ready-to-use media and diluents
- Automated sample preparation
- Reduce hands-on time and increase lab efficiency

DILUMAT®

SMASHER®

APS ONE

Verification

BIOBALL® delivers unprecedented accuracy and precision, bath after batch. A small freeze dried water-soluble Certified Reference Material containing a precise number of viable micro-organisms for Quantitative Quality Control.

Hand-In-Hand Partnership

Moving from Tests Results to Actionable Insights

Ensure data security, easy maintenance resolution, and traceable record keeping with the bioMérieux set of data management tools, all from wherever you are at the moment.

VILINK®

Predict and Protect: VILINK[®] keeps your laboratory working via an intelligent instrument management system. Rapid and accurate diagnosis allowing quick maintenance and resolution of instrument issues to prevent major setback with nutraceutical testing, all of which can be done remotely.

- Ensure continuous testing operations
- Troubleshooting and diagnostics
- · Service instruments easily, contact-free, and outside of running/usage hours

CONNECT-UP™

Centralized and digitized data management, there to reinforce quality and secure your data. Ultimately, CONNECT-UP™ increases productivity & traceability with more reliable decisions being made during product release workflows.

- Enhances laboratory quality management
- Improve data integrity & profitability
- Reduce human error to be Audit-Ready

ENVIROMAP®

ENVIROMAP® brings a suite of digital tools to enhance your Environmental Monitoring Program with digital, traceable, actionable data to improve your operation. Making decisions in real-time can help protect your brand, increase your efficiencies, and maximize your profits.

- Data driven decisions prescriptive corrective actions
- Result mapping
- Real-Time Out-Of-Spec Notifications
- Full Traceability
