A GLOBAL HEALTH CRISIS

47,000,000 - 50,000,000 cases per year

1 in every 5 deaths worldwide is associated with sepsis

Survivors may face lifelong consequences

At least 11,000,000 die – 1 death every 2.8 seconds

COMMON SOURCES OF SEPSIS

- Meningitis
- Pneumonia
- Bloodstream Infection
- Skin or Soft Tissue Infection
- Urinary Tract Infection
- Catheter-Related Infection
- Infection of Unknown Source and Viruses, such as SARS-CoV-2

COMMON SOURCES OF SEPSIS

- Appendicitis
- Infectious Diarrhea
- Gallbladder Infection

Everybody Can Get Sepsis – Certain People Are at Even Higher Risk

- Adults Over 60
- Children Under 1
- People with Weakened Immune Systems e.g. AIDS, Diabetes
- People with Chronic Diseases e.g. Lung, Liver, Heart
- People with No Spleen

PREVENTION SAVES LIVES

Prevent Infection – Prevent Sepsis – Save Lives

Hand Hygiene
Vaccination
Clean Water
Awareness
Prevent HAIs (Hospital-Acquired Infections)
Safe Childbirth

Adapted from Global Sepsis Alliance
Sepsis Does Not End at Hospital Discharge

POST-SEPSIS SYMPTOMS

- Difficulty Sleeping
- Sadness
- Clouded Thinking
- Muscle Weakness
- Difficulty Swallowing
- Fatigue
- Anxiety
- Poor Memory
- Difficulty Concentrating

Quickly identifying these symptoms can save lives.

1. Disorientation
2. Shortness of breath
3. Tachycardia
4. Fever, shivers
5. Extremely ill
6. Pale skin

ACT FAST. SAVE LIVES.
